

# i-Grip

## New disposable trocar

For better grip  
and insertion control

Patent pending Innovation

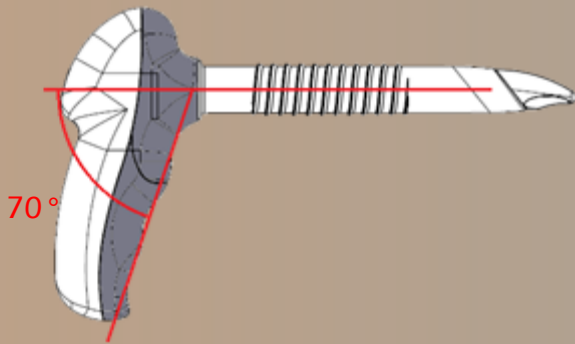

Automatic closing system of  
the CO2 stopcock

Improved Ergonomics

A trocar for the surgeon hand

## Dilating Tip

Streamlined dilation tip obturator reduces friction during insertion

## Ideal ergonomics

- 70 degrees high grip handle enables a straight line through the arm and wrist
- Trocar CO2 port and stopcock enclosed in the handle allows perfect ergonomics

## Controlled insertion

- Reduced risk of inner organ damage
- Reduced abdominal wall damage

Automatic closing system of the CO2 stopcock during insertion (patent pending)

- Cannula thread devised to ensure a strong retention force with minimum abdominal wall defect
- Universal seal for easy of use with different sized instruments

Available sizes: 5mm, 10mm and 12,5mm

CE 1936
